

GROOMINGDALES

Professional Grooming Services for Dogs

The Bath and Brush Spa Treatment:

The Bath and Brush Treatment consists of a warm soothing bath in fragrant non-allergenic shampoo followed with a natural oatmeal conditioner that moisturizes your pet's skin and adds a healthy gleam to their coat. All dogs that need it will have their anal glands expressed externally while in the tub. Next, your pet will receive a high-powered blow dry and brushing which cleans and clears your pet's skin follicles while ridding your pet of any loose or tangled hair. We will then perform a sanitary clip. The ears will be plucked if necessary and cleaned with a premium ear cleaner to prevent infection. Your pet will then receive a nail trim. We can also provide a colorful scarf or bow upon request.

The Royal Treatment:

The Royal Treatment includes all the luxuries of the Bath and Brush Spa Treatment as well as a haircut to your specifications.

The Works Treatment:

The Works Treatment is for those pets in dire need of special treatments which might include severe matting and people-aggressive pets. The Works Treatment includes everything in the Royal Treatment as the condition of the coat will allow.

The Groomer:

Jayne has been grooming for over 9 years. She has worked at Mountain View Veterinary Health Center since 2018 and has recently completed Fear Free training for groomers. She grooms dogs of all sizes.

Price of Groom Varies
by Breed and Pet
